IN THE CLAIMS

Claims 1-30 previously cancelled without prejudice.

31. (currently amended) A consumable film adapted to rapidly dissolve in the mouth of a consumer, wherein said film comprises a single layer including pullulan, from about 0.1% to about 2 wt% of a stabilizing agent selected from the group consisting of xanthan gum, locust bean gum and carrageenan and at least one pharmaceutical agent, wherein said pharmaceutical agent is selected from the group consisting of non-steroidal anti-inflammatory agents, antitussives, decongestants, anti-histamines, expectorants, anti-diarrheals, H2-antagonists, proton pump inhibitors, central nervous system agents, analgesics and mixtures thereof.

Claims 32 and 33 were previously cancelled without prejudice.

34. (previously presented) The consumable film according to claim 31, wherein the non-steroidal anti-inflammatory agent is selected from the group consisting of aspirin, acetaminophen, ibuprofen, diflunisal, fenoprofen calcium, naproxen, tolmetin sodium, indomethacin, and mixtures thereof.

35. (previously presented) The consumable film according to claim 31, wherein the anti-tussive is selected from the group consisting of benzonatate, caramiphen edisylate, dextromethorphan hydrobromide, chlrophedianol hydrochloride and mixtures thereof.

36. (previously presented) The consumable film according to claim 31, wherein the decongestant is selected from the group consisting of pseudoephedrine hydrochloride, phenylephrine, phenylpropanolamine and mixtures thereof.

37. (previously presented) The consumable film according to claim 31 wherein the anti-histamine is selected from the group consisting of brompheniramine maleate, chlorpheniramine maleate, carbinoxamine maleate, clemastine fumarate, dexchlorpheniramine maleate, diphenhydramine hydrochloride, diphenhydramine citrate, diphenylpyraline hydrochloride,

doxylamine succinate, promethazine hydrochloride, pyrilamine maleate tripeleennamine citrate, triprolidine hydrochloride and mixtures thereof.

38. (previously presented) The consumable film according to claim 31, wherein the expectorant is selected from the group consisting of guaifenesin, ipecac, potassium iodide, terpin hydrate and mixtures thereof.

39. (previously presented) The consumable film according to claim 31, wherein the anti-diarrheal is loperamide.

40. (previously presented) The consumable film according to claim 31 wherein the H₂-antagonist is selected from the group consisting of famotidine, ranitidine and mixtures thereof.

41. (previously presented) The consumable film according to claim 31, wherein the proton pump inhibitor is selected from the group consisting of omeprazole, lansoprazole, and mixtures thereof.

Claims 42-47 were previously cancelled without prejudice.

48. (currently amended) A consumable film adapted to rapidly dissolve in the mouth of a consumer, wherein said film comprises a single layer including pullulan, from about 0.1% to about 2 wt% of a stabilizing agent selected from the group consisting of xanthan gum, locust bean gum and carrageenan and at least one pharmaceutical agent, wherein said pharmaceutical agent comprises dextromethorphan.

49. (previously presented) The consumable film of claim 48 wherein said dextromethorphan is in the salt form of dextromethorphan hydrochloride.

50. (previously presented) The consumable film of claim 49 wherein said dextromethorphan hydrochloride is an amount from about 10 mg to about 20 mg.

51. (currently amended) A consumable film adapted to rapidly dissolve in the mouth of a consumer, wherein said film comprises a single layer including pullulan, from about 0.1% to about 2 wt% of a stabilizing agent selected from the group consisting of xanthan gum, locust bean gum and carrageenan and at least one pharmaceutical agent, wherein said pharmaceutical agent is famotidine.

52. (previously presented) The consumable film of claim 50 wherein said famotidine is an amount of about 10 mg.

53. (previously amended) A consumable film adapted to rapidly dissolve in the mouth of a consumer, wherein said film comprises a single layer including pullulan and at least one pharmaceutical agent, wherein said pharmaceutical agent comprises phenylephrine.

54. (previously presented) The consumable film of claim 53 wherein said phenylephrine is in the salt form of phenylephrine hydrochloride.

55. (previously presented) The consumable film of claim 54 wherein said phenylephrine hydrochloride is an amount of about 10 mg.
